

To import the demo code, do the following:

1. Download the zipped project file and unzip the contained project folder into the PlatformIO project directory (by default the directory is Documents/PlatformIO/Projects).
- 2.

3. Navigate to the folder of the project you just unzipped, select it, and press open.
4. If the project folder does not show up in the explorer window after step 3, right click in the explorer panel and select “add to workspace”.
